## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species:

#### **I. Cyclic carbonates that encompass a number of distinct compounds**

The species are independent or distinct because the claimed formula I (claim 10) encompass several cyclic carbonate compounds that are different from each other based on the substitution for the variables X, Z, R2 and R1. For example, according to claim 11, entirely different cyclic carbonates result depending upon when X=O, R1 and R2 may form a 5-carbon ring or a 6-carbon ring. Further, according to formula I, X may include sulfur, which further results in distinct compounds, from the compounds when X=O.

Accordingly, applicants are required to elect a single, ultimate disclosed species of a cyclic carbonate (not a sub-genus) for examination. Upon electing a single cyclic carbonate compound, applicants are further required to elect from the following "method of treatment":

#### **II. Method of treatment:**

1. Hair styling or hair shaping or making-up of hair
2. Hair washing or hair care
3. Hair coloring

Art Unit: 1615

4. Eyelash treatment
5. Skin treatment and
6. Nail treatment.

The species are independent or distinct because a treatment for skin is different from treating nails, which is different from treating hair. Further, a treatment involving hair coloring does not always involve hair washing or styling.

**Upon electing a single cyclic carbonate compound and a single method of treatment associated with the elected cyclic carbonate, applicants are further required to elect a single component from the following “additional components”:**

### **III. Additional components**

1. Fixative polymers and conditioning agents
2. Dyes
3. Oxidizing agent

The species are independent or distinct because a treatment that involves hair coloring with dyes does not necessarily include hair conditioning. Similarly, a nail composition involving dyes does not require oxidizing that is generally performed during hair bleaching. Thus, each of the species is different.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 15 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Due to the complexity of the restriction requirement, a telephone call was made to the applicants' representative to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lakshmi S. Channavajjala whose telephone number is 571-272-0591. The examiner can normally be reached on 7.00 AM -4.00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on 571-272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
